

(Any) languages not perform type making?

* done at compile time

- perl, php, javascript

scripting languages
get type
when used
(dynamically)

} weakly
typed

- weak/strong
\$x = 10;
\$y = \$x. "20";
if (\$x)

- static/dynamic
python

* can still do weak in strong, just
more work

if (Something)
 a=1
 b=2
else
 a="1"
 b="2"
c = a+b

} only interpreted
languages
